

Dynamysk Automation Ltd. Announces Partnership With Zimtac Ltd.

Calgary (August 16 2016) – **Dynamysk** is pleased to announce we have partnered with Zimtac Ltd. in order to extend our Industrial Automation services to East Africa.

Zimtac Limited (Ltd) was founded in 2008 to provide services and products in various technological fields in an execution or advisory capacity related to engineering services opportunities in Canadian and African Markets. The Zimtac team provides their clients with specialized insight and expertise to meet their business objectives in complex and competitive markets.

Dynamysk has partnered with Zimtac to diversify our service offerings with new geographical locations. The East African oil and gas market is very active and we consider this area to have significant growth potential for Dynamysk.

"This is another positive and exciting step for Dynamysk towards our goal of being the preferred 'one-stop-shop' for our clients' electrical, instrumentation and controls needs. This partnership demonstrates our continued commitment to deliver high value-added services, closer to our clients' operations. We look forward to working with Zimtac on various projects." said John Lisoway, President & C.E.O.

ABOUT ZIMTAC:

Zimtac has a consistent record of quality services and products, top-level customer satisfaction, an excellent safety record while supporting sustainable growth for our clients. Our service and product deliveries include Condition Monitoring Systems (CMS), Industrial Instrumentation Controls and Electrical (ICE) Commissioning, Electric and Magnetic Field (EMF) Consultation, Soil Resistivity Test (SRT), Commercial Unmanned Aerial Vehicle (UAV) services such Aerial Photography and Videos, mapping & 3D modeling which support Engineering design. Our team has long-standing relationships with key institutions in public and private sectors in African countries (especially in Tanzania, Zimbabwe, Mozambique, Rwanda, Democratic Republic of Congo, South Sudan, Ghana and Kenya).

ABOUT DYNAMYSK:

Dynamysk is a Canadian based enterprise specializing in instrumentation, controls, and electrical (ICE) systems engineering, design, fabrication, construction, commissioning and maintenance. Our foundation is a history of trust, respect and value within the energy sectors in Canada and abroad. Dynamysk's value, domain and trademarked solution expertise has proven to reduce project schedules, costs and risks for our clients.
